

Silverleaf Garden Club

The Silverleaf Garden Club was formed in February 2002. The purpose of the club is to encourage and promote interest in all aspects of gardening. Meetings are held the first Tuesday of the month at the home of a club member and are announced in advanced via email and signs at the Silverleaf entrances. The club meets September through May.

Each meeting focuses on a particular aspect of gardening. Professional horticulturists and landscapers are invited to speak on and display examples of their specialty to club members. Past programs have covered topics such as roses, perennials, shrubs, trees, orchids, current garden practices, plant materials, seasonal yard care and landscape ideas. Planting tips and plants from members' gardens are exchanged. Club members also receive information about special gardening events being held throughout South Carolina and neighboring states. Annual social events include an alfresco salad supper and a Christmas party.

Being a member of the Silverleaf Garden Club is a great way to get good information on gardening, meet your neighbors and make new friends. All Silverleaf residents are welcome to join. For contact information and a schedule of meetings, please look for signs posted at the Silverleaf entrances or in the Association newsletter.
